

Your Rights Concerning Insurance Filing

We realize there are instances in which you do not wish a claim to be filed with your insurance company. You may, in fact, desire that your insurance company not know anything about the service you receive, for any reason.

Federal "HITECH" law allows you to request that we not notify your insurance company, nor file a claim with them, if you do not want them to know about the service you've requested. You may request a private contract with your healthcare provider. You are then allowed to pay, out-of-pocket, for the service without your insurance company's knowledge.

If we can provide further information or you would like to sign a private contract for services, please contact our office.
